ASPIRE: activity diagram of the original plan (as designed)

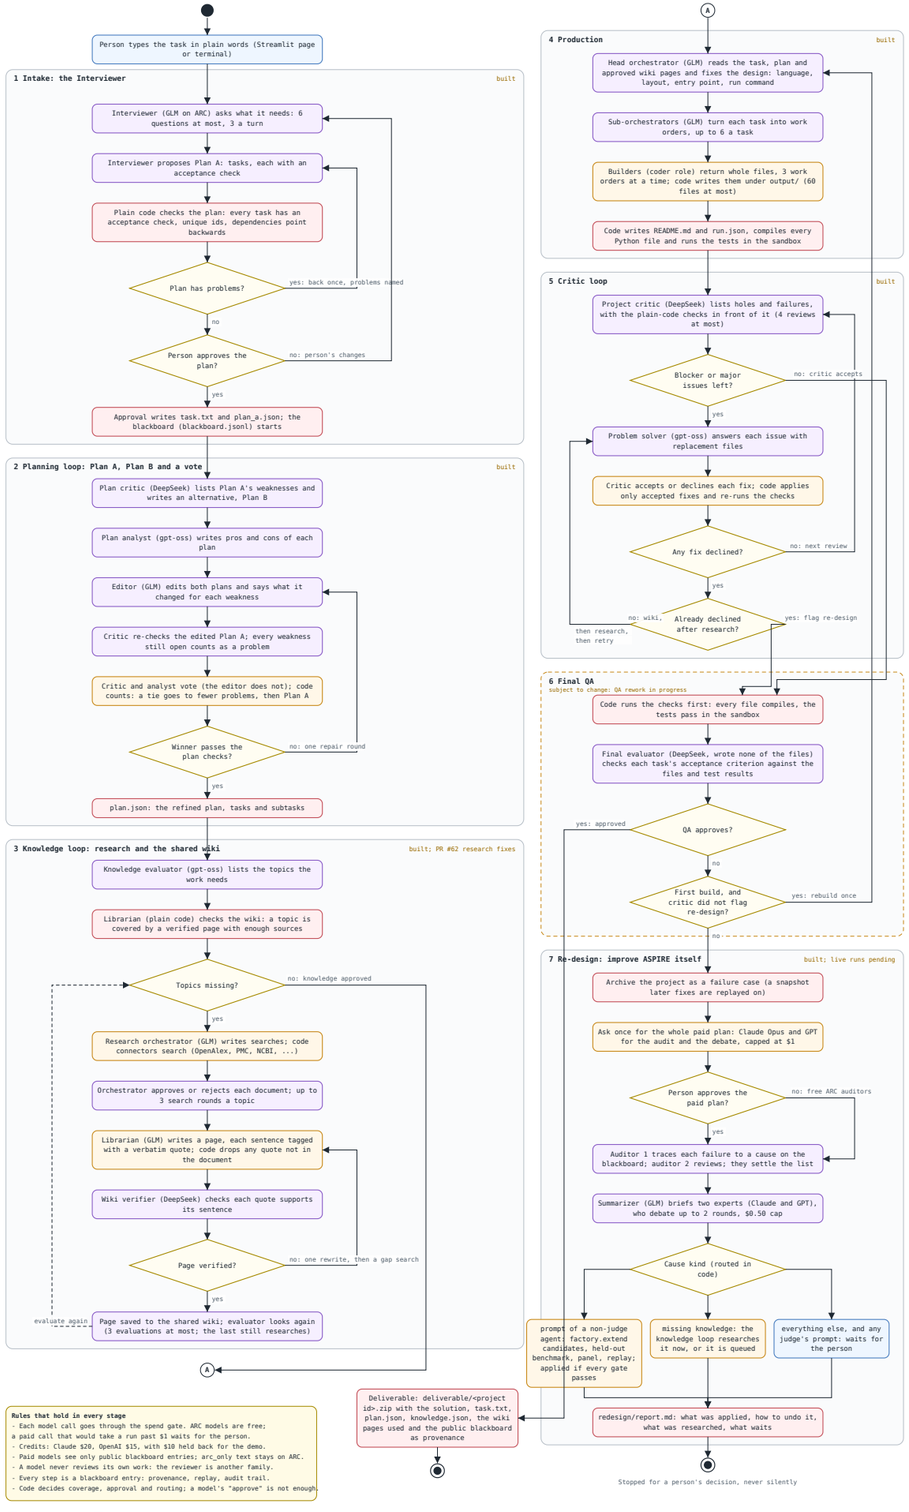

Notes on the plan

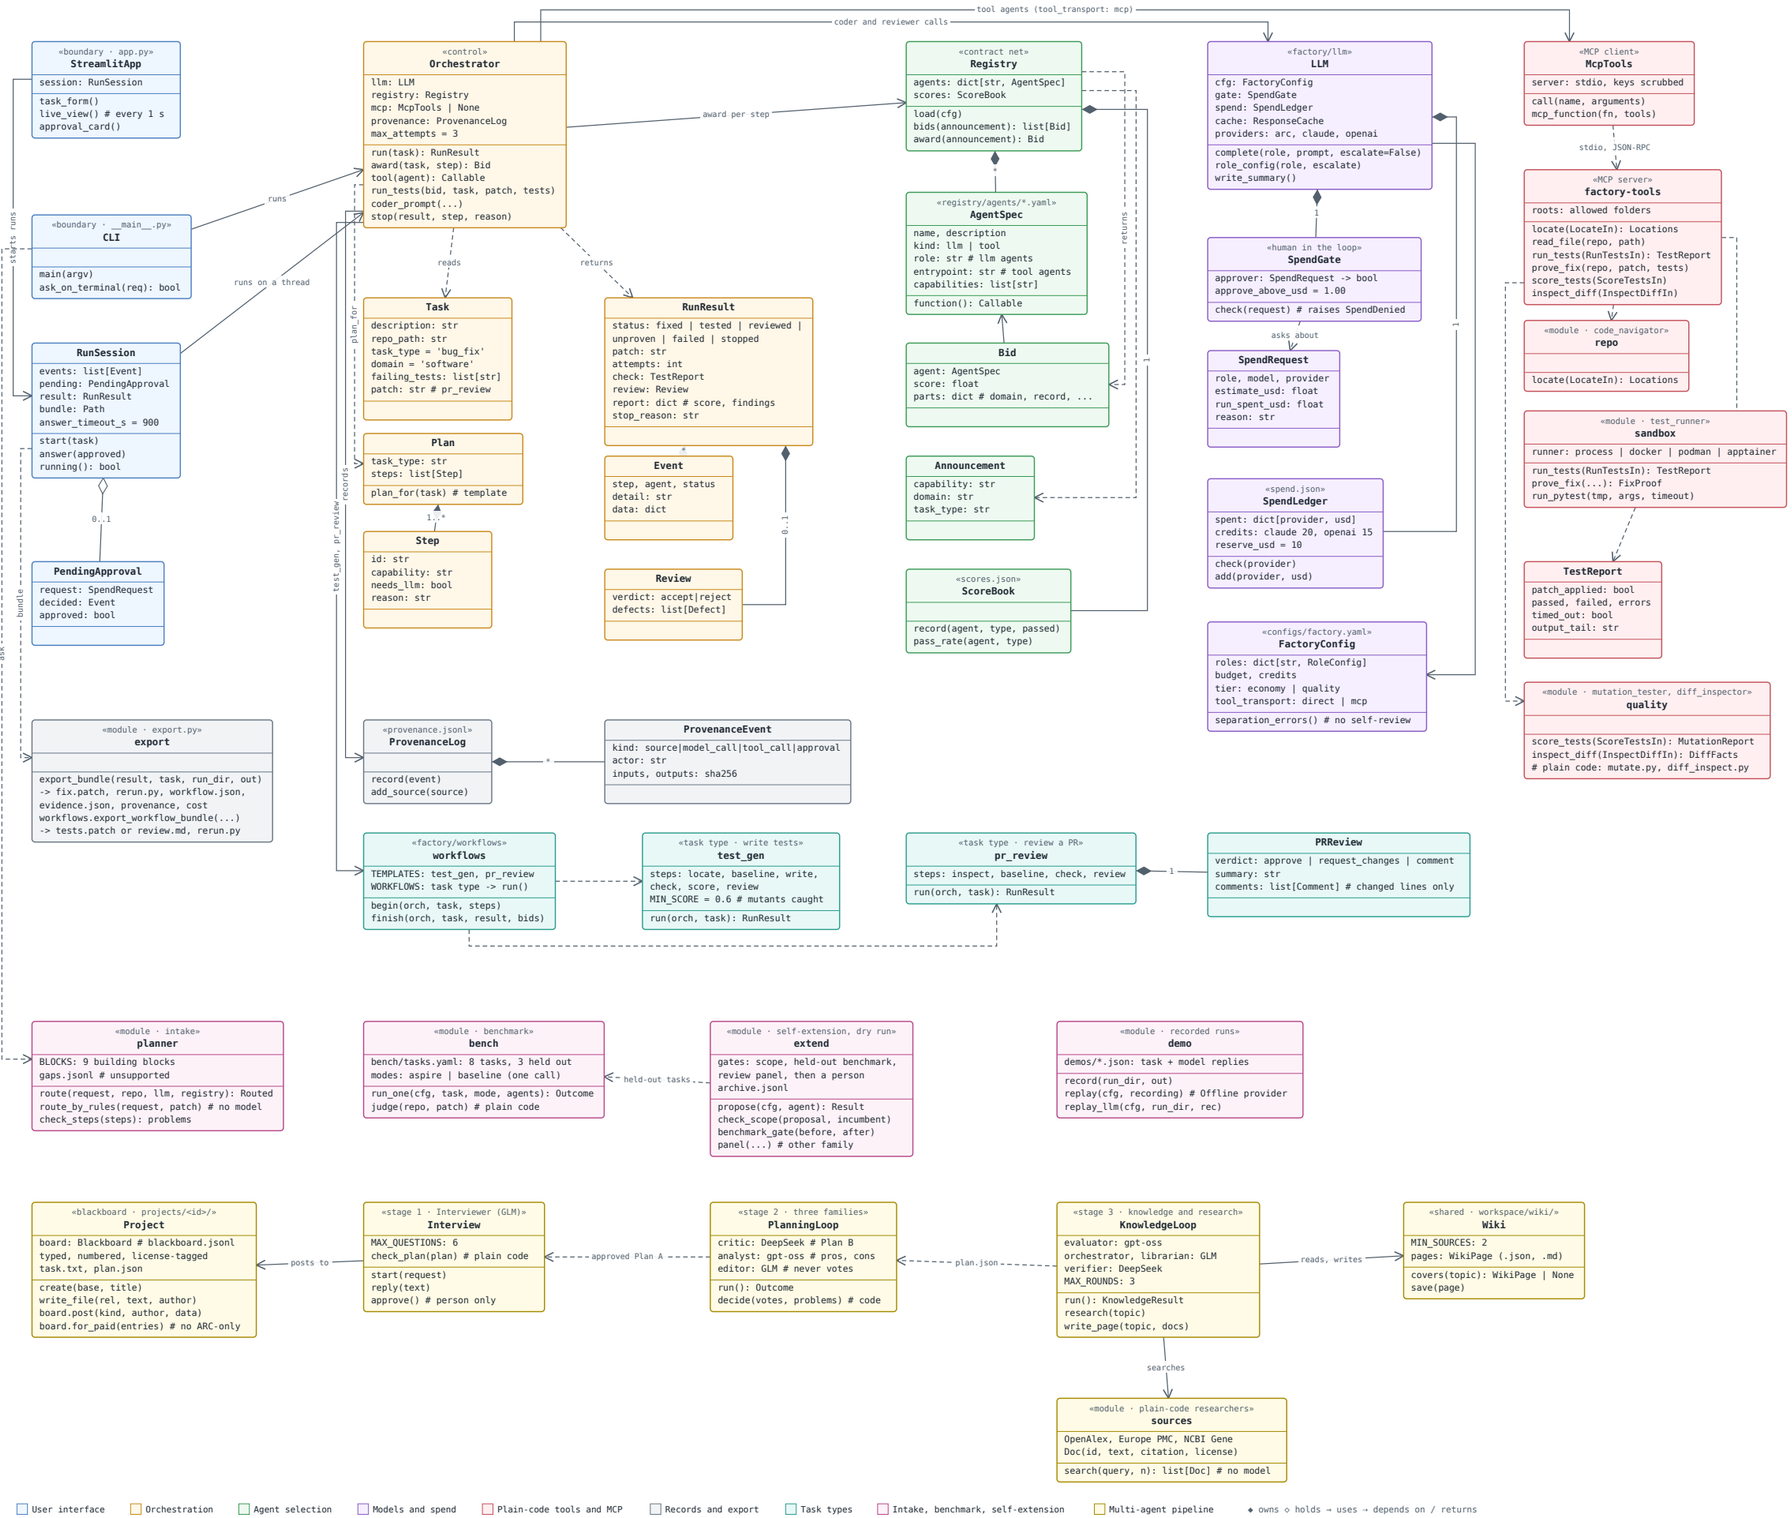

- Every agent runs on an ARC model except the Claude and ChatGPT calls in the re-design debate, which spend credits against a cost limit.
- Agents share one blackboard from the moment the folder is created.
- Models are numbered as in the plan; a different model checks each stage's work (planner 2, problem solver 1, auditor 2, the verifier).
- As built, the editor does not vote and email delivery is left out.

person · model step · plain step · model and tools

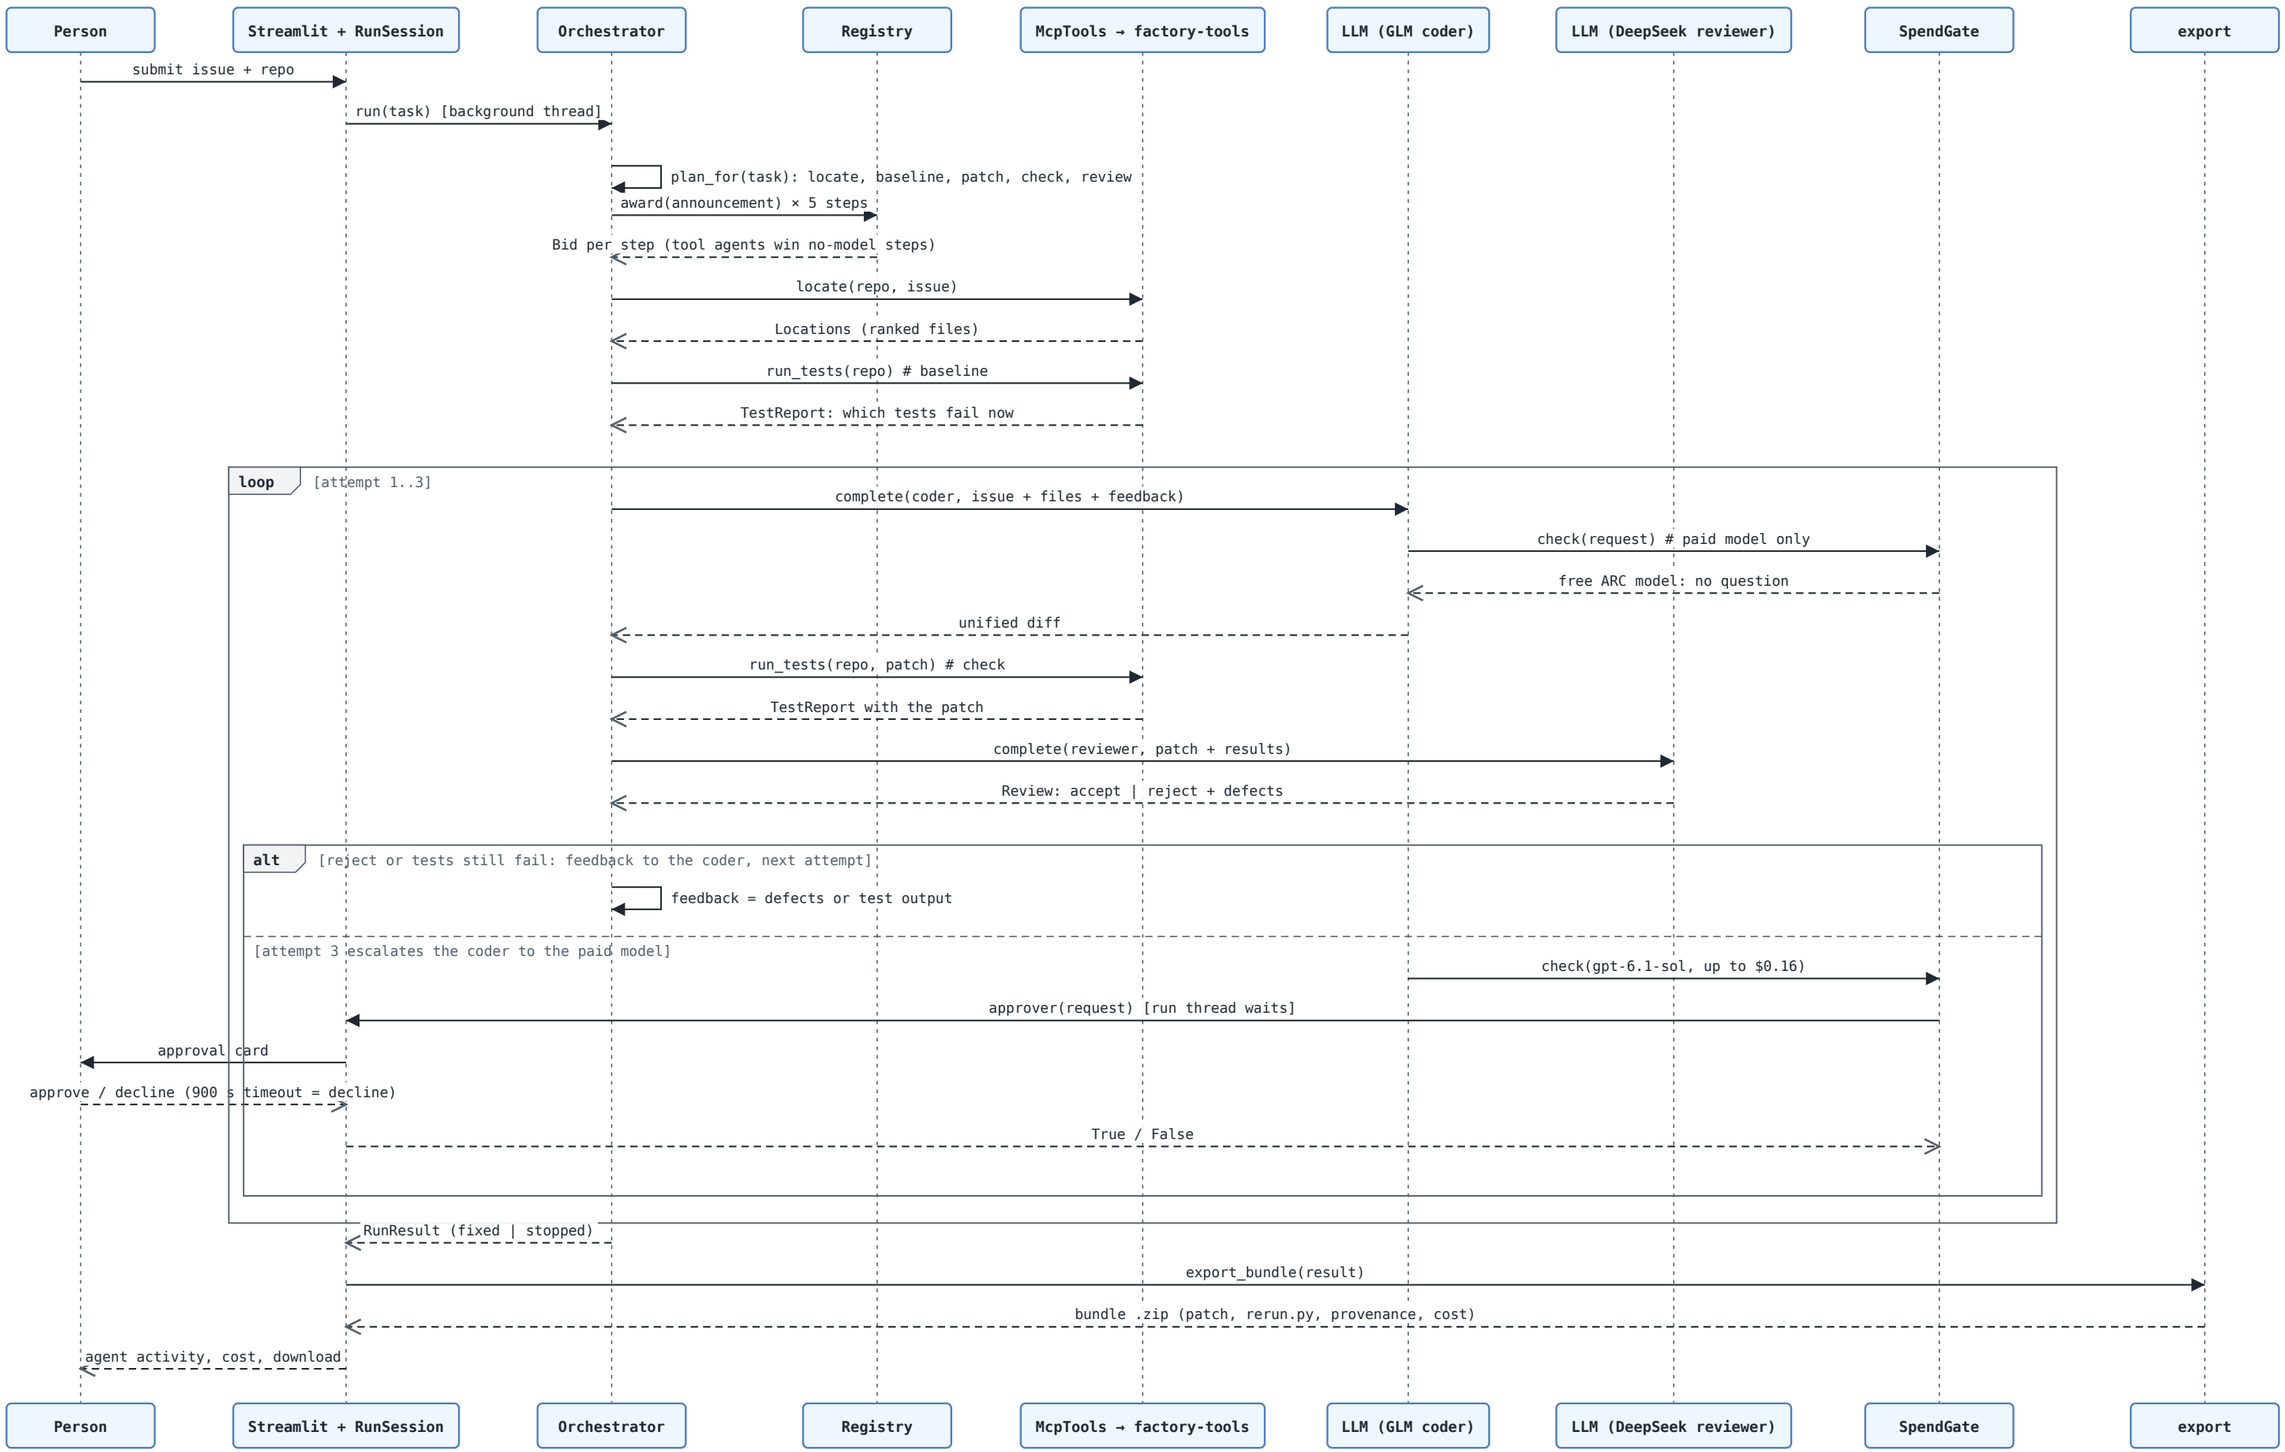

ASPIRE: activity diagram, one run from plain-language task to deliverable or re-design

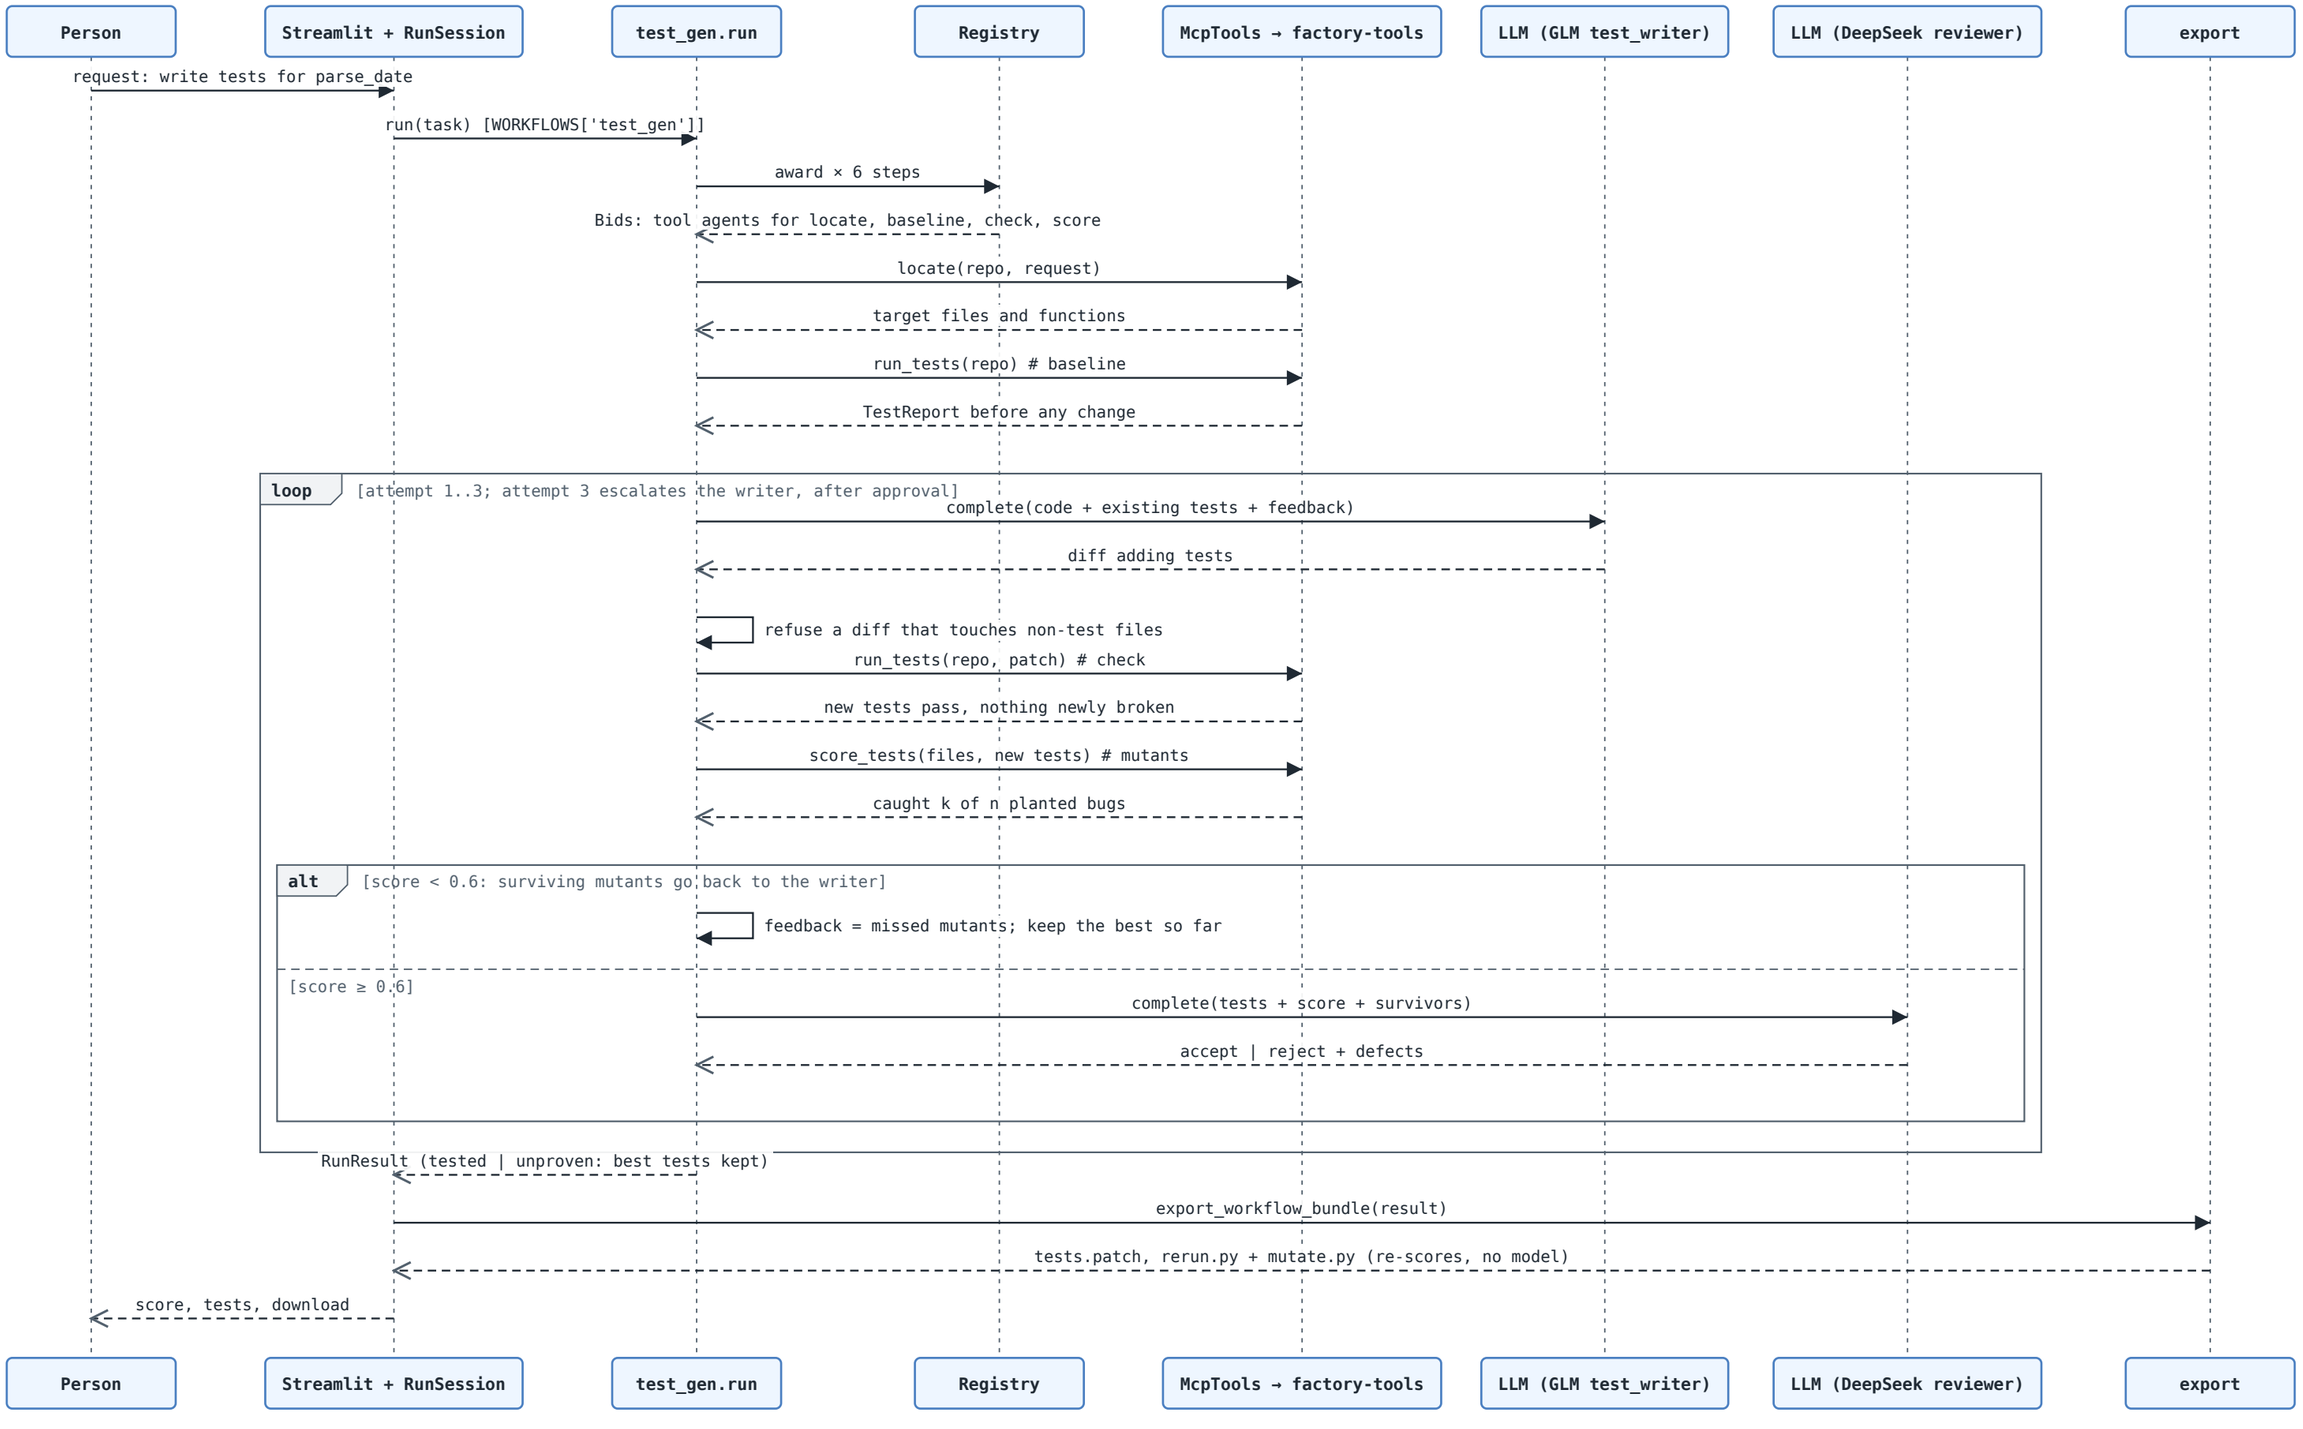

ASPIRE: UML class diagram

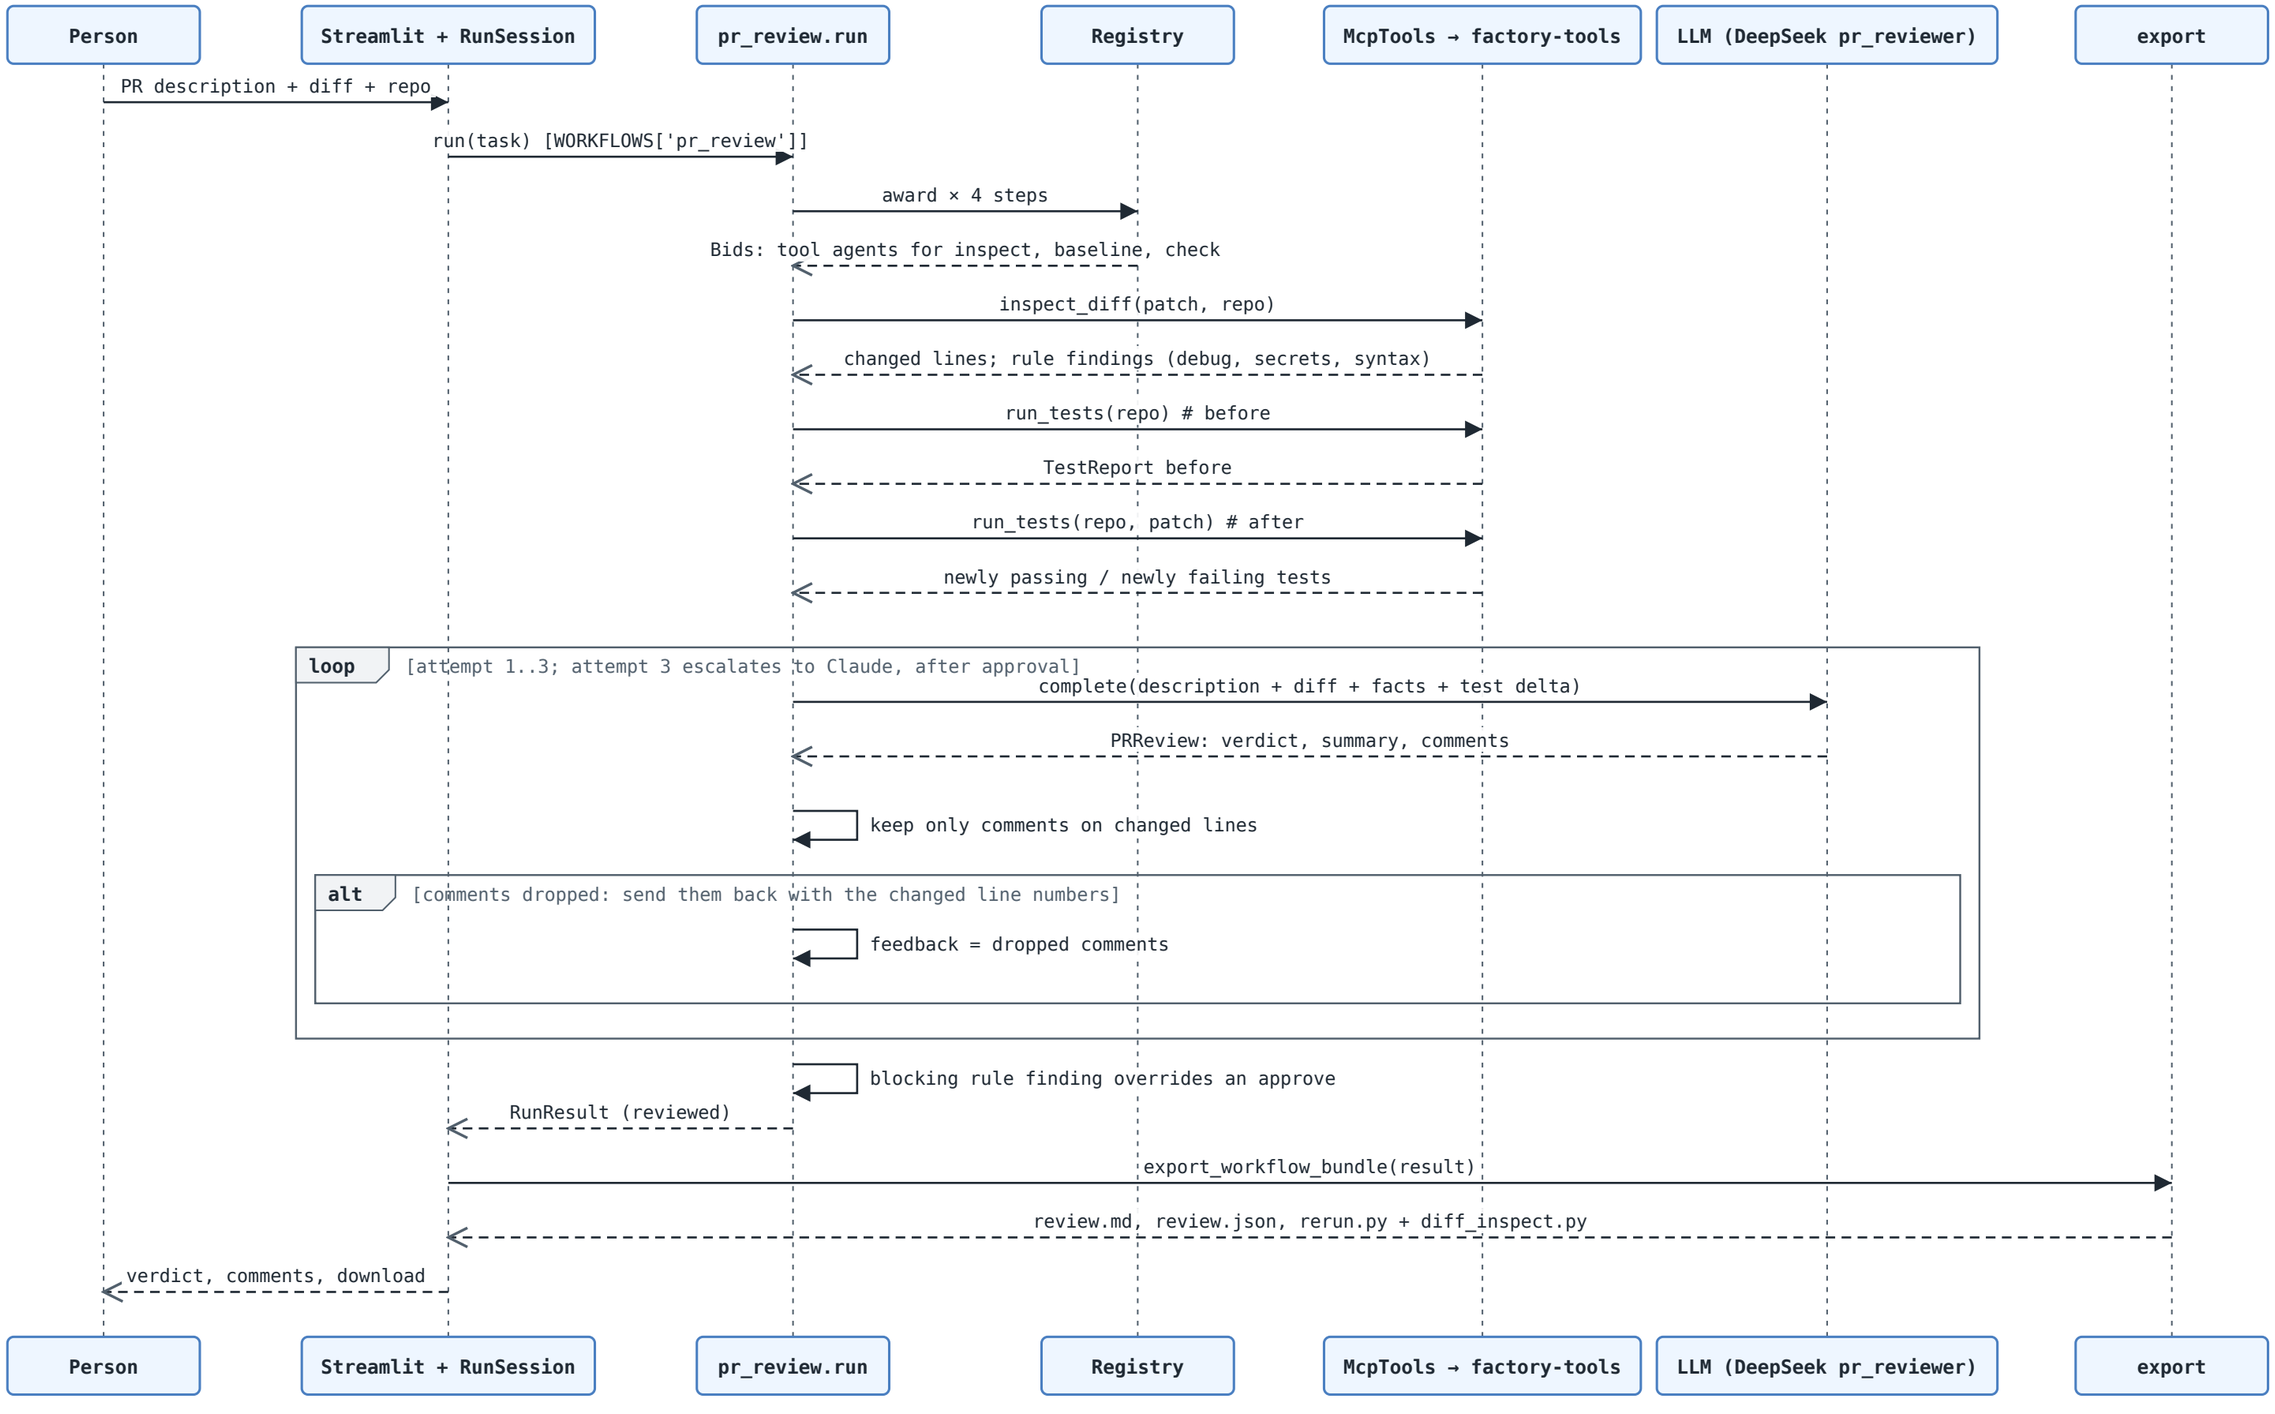

ASPIRE: sequence diagram, one bug-fix run

ASPIRE: sequence diagram, writing tests

ASPIRE: sequence diagram, reviewing a pull request

ASPIRE: sequence diagram, self-extension dry run
